Vetuonglai - Final Brand Lock v2

Refined symbol system, sharper monogram, updated live contact blocks.

Direction chosen: aperture orbit + breakout V trajectory.
Goal: colder, more premium, less generic than the earlier circle-check mark.
Locked fields used in contact blocks: Trần Hà Tâm • Founder • tranhatam@gmail.com • vetuonglai.com • @tranhatam

The symbol keeps the original logic from the prompt library: open circle outline + forward V stroke. What changed is the memory profile.
The outer orbit now has a controlled northeast aperture; the V exits through that opening; a secondary inner arc stabilizes the form and makes it feel less commodity.
Across the kit, the monogram was rebuilt as a custom VT ligature rather than plain text inside a gradient square.

Core marks

Primary symbol, mono application, and custom monogram.

Symbol

Open orbit. Controlled aperture. Breakout V. Small stabilizer dash.

Monogram

Custom VT ligature. Not a default text block.

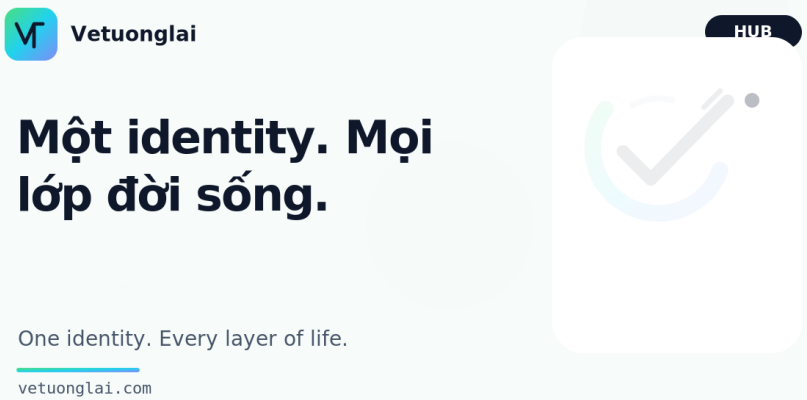

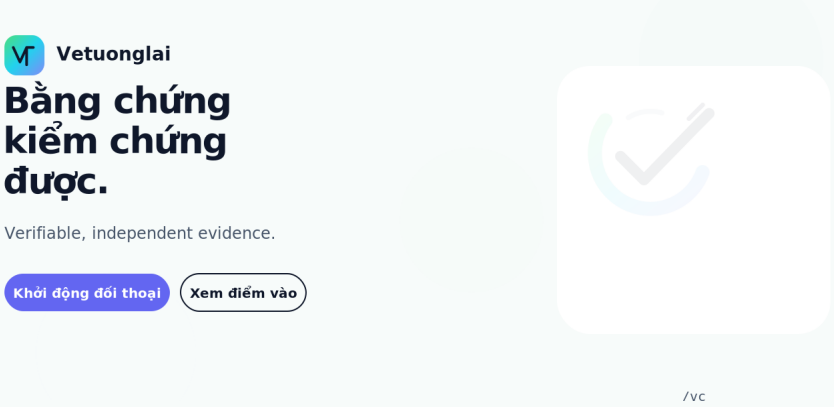

Wordmark lockup

Calm text plane + stronger mark contrast for premium use.

System usage

Palette, tone, and applied examples from web/social surfaces.

mint cyan violet slate off-white vc edu business

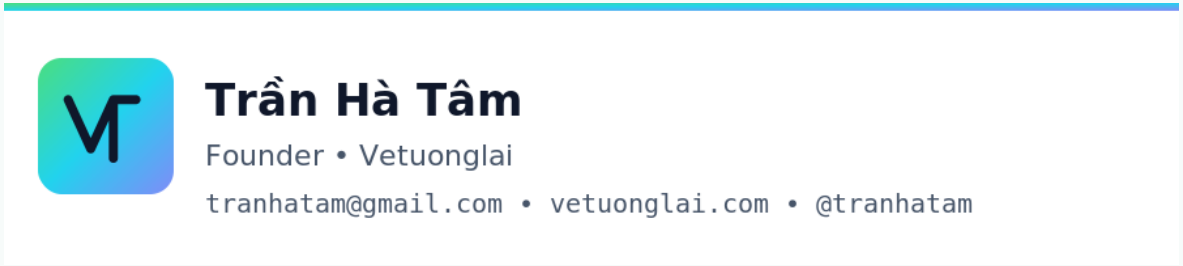

Display direction: bold sans with generous whitespace; serif reserved for softer quotations/taglines.
Visual discipline: off-white grounds, soft blur fields, minimal but not flat.
Brand tone remains calm, evidence-first, and non-hype, per the supplied prompt library.

Print + live contact blocks

Only fields actually available were locked. No phone or postal address was invented.

Closeout

This package is ready for design review and downstream export.

Recommended next step: choose whether the symbol should stay “co premium” as shipped, or be pushed further into a more technological more editorial direction.

Because the structural system is already rebuilt, a final style move later would be a controlled reskin rather than a restart.
