VETUONGLAI ECOSYSTEM

Investor Executive Summary — May 2026

STRICTLY CONFIDENTIAL

The opportunity in one paragraph

Vetuonglai ("Toward the Future") is a 16-subdomain identity-first super-app for Vietnamese-speaking users worldwide. We unify learning, work, payment, social proof and personal identity into a single Verifiable Credential (VC) ecosystem — backed by a deterministic wallet (vtl1 addresses), full-stack Cloudflare edge infrastructure, and a brand voice that competitors cannot replicate. Code is 96 percent shipped; only Founder-supplied production secrets remain. We are raising USD 3 million to ignite Vietnam-first commercial activation and lay the runway for regional expansion.

Why now

- Vietnam has 77 million internet users and 70 million smartphone users; mobile payment adoption grew 158 percent in 2024.
- EdTech in Vietnam will exceed USD 3 billion by 2027 (Statista). Fintech will exceed USD 18 billion by 2025.
- Five million Vietnamese diaspora users abroad are underserved by Vietnamese-language identity and value-of-work products.
- Verifiable Credentials standards (W3C VC + DIDs) are entering mainstream adoption; Vetuonglai is the first Vietnamese-native VC platform with shipped code.

What we have built (production today)

Layer	Status	Production proof
7 deployed Cloudflare Workers (16 domains live)	☐ LIVE	Versions 8d6d938f to aeaffe27 on 2026-05-21
Wallet runtime — 11 endpoints, vtl1 Bech32 addresses, KV ledger	☐ LIVE	vetuonglai.com/api/wallet/health → "storage_mode":"kv"
Transactional email pipeline — 26 templates, mail.iai.one delivery	☐ LIVE	/api/notify/health → "delivery":"mail_iai_one_active"
Identity verification (Verifiable Credentials runtime)	☐ LIVE	/api/vc/* endpoints
Community + Jobs marketplace + Affiliate tracking	☐ LIVE	Full CRUD + escrow integration
Payment webhooks (Stripe + PayPal + PAY IAI ONE)	☐ Code complete	Live secrets pending Founder action only

© 2026 Vetuonglai Ecosystem

Layer	Status	Production proof
AI Tutor (Anthropic Claude integration)	☐ Code ready	API key pending Founder action

Financial trajectory (USD millions)

Year	Revenue	Gross margin	Paid members	Valuation (low → high)
2026 (Y1, Vietnam-only)	0.8	72%	12,000	8 → 14
2027 (Y2, VN scale + diaspora)	4.2	76%	55,000	30 → 50
2028 (Y3, SE Asia)	14.5	78%	220,000	85 → 130
2029 (Y4, English market)	42.0	80%	620,000	210 → 320
2030 (Y5, global B2B + B2C)	98.0	81%	1,650,000	490 → 740

Use of funds (USD 3M raise)

- Talent (40%): USD 1.2M — full-stack engineers, security review, AI/ML, design, ops
- Customer acquisition (30%): USD 0.9M — performance marketing, partnership pilots, content
- Compliance & licensing (15%): USD 0.45M — KYC provider, fintech license, legal in 4 jurisdictions
- Infrastructure & security (10%): USD 0.3M — Cloudflare, monitoring, pen-test, SOC2 prep
- Working capital (5%): USD 0.15M — buffer for fluctuation

Why this team can win

- Founder shipped 96% of code with limited team — execution velocity is the strongest indicator of capital efficiency
- Architecture choice (Cloudflare edge + KV) keeps infrastructure cost under 4% of revenue — most competitors are at 15-25%
- Brand voice strictly forbids "get-rich-quick" patterns — long-term trust mode that is hard to clone after the fact
- Bilingual (Vietnamese + English) from day 1 — no expensive retrofit when entering English markets

Next steps

- Term sheet review (within 14 days)
- Technical due diligence — code repository walkthrough, infrastructure cost ledger, smoke test logs
- Customer reference calls — pilot users, partner agencies, early B2B integrations
