COMPANY PROFILE

Vetuonglai Ecosystem — Detailed Introduction

Confidential — May 2026

1. Who we are

Vetuonglai (Vietnamese for "Toward the Future") is a unified digital ecosystem that brings learning, working, paying, proving and community into a single identity layer for every member. Our mission is to give Vietnamese-speaking individuals — domestic and diaspora — a transparent, verifiable digital identity that converts knowledge into action, action into outcomes, and outcomes into independently verifiable proof.

2. The 16-subdomain ecosystem

Each subdomain serves one pillar of human capability development. They share a single wallet, single identity, single design language.

Subdomain	Pillar	Role
vetuonglai.com (hub)	System map	Root entry and ecosystem overview
vc.vetuonglai.com	Trust	Verifiable Credentials issuance and verification
member.vetuonglai.com	Identity	Member dashboard, wallet, journey
edu.vetuonglai.com	Learning	Courses, AI tutor, skill verification
finance.vetuonglai.com	Value	Personal finance, planning, disclosures
invest.vetuonglai.com	Value	Investment guidance with risk disclosure
work.vetuonglai.com	Mission	Job marketplace with escrow
business.vetuonglai.com	Mission	B2B tools and verifiable credentials
green.vetuonglai.com	Earth	Sustainability tracking, eco-action proof
life.vetuonglai.com	Life	Lifestyle, habits, well-being
market.vetuonglai.com	Value	Marketplace for verified creators
community.vetuonglai.com	Stories	Social layer with circles and moderation
ai.vetuonglai.com	AI	AI-assisted productivity

Subdomain	Pillar	Role
read.vetuonglai.com	Learning	Long-form publishing and reader progress
docs.vetuonglai.com	Trust	Documentation, legal, governance
kids.vetuonglai.com	Life (isolated)	Child-safe learning zone (6-17, no ads, parent-mediated)

3. Technology backbone

3.1 Edge-first architecture

The entire platform runs on Cloudflare's global edge network: Workers for compute, KV for storage, Pages for static delivery. There is no traditional origin server. This delivers:

- Sub-50 ms response time globally
- Infrastructure cost under 4 percent of revenue at scale (industry typical: 15-25 percent)
- Zero capacity planning — scales instantly with demand
- Built-in DDoS protection, no separate WAF spend

3.2 Wallet system

Every account auto-receives a deterministic vtl1 wallet address derived via HMAC from email + server secret. Addresses follow Bech32-style encoding (36 characters total). The wallet supports VND ledger operations: pending balance, available balance, tax-held, withdrawn. Eleven API endpoints handle credit, debit, transfer, payout request, payout settlement, KYC submission, and history.

3.3 Identity (Verifiable Credentials)

VC layer issues W3C-compliant Verifiable Credentials for verified achievements — course completion, job completion, professional certification, identity verification. Credentials are signed, tamper-evident, and verifiable by any third party with the public key.

3.4 Email + Notification

Channel A (form submissions) and Channel B (magic-link authentication) run on the in-house mail.iai.one provider. Channel C (transactional notifications across 26 templates) uses the same provider for unified deliverability and observability. Live measurement: `delivery: "mail_iai_one_active"` as of 2026-05-21.

4. Revenue streams

Vetuonglai monetizes through five complementary lanes, each with low marginal cost and recurring potential:

Stream	Mechanic	Take rate
Annual Access (lifetime unlock)	USD 99 / year per member	n/a (subscription)
Specialist Packs	USD 19 to USD 49 per pack	n/a (one-off)
Job Marketplace	Escrow + payout fee	8-10% of job value

© 2026 Vetuonglai Ecosystem

Stream	Mechanic	Take rate
Affiliate Program	Referral commissions to partners	10-20% pass-through
Wallet Payout Fee	Free tier 2%, Elite tier 0%	2% of payout
B2B Identity Verification API	Per-verification API call	USD 0.50 to USD 2.00
B2B VC Issuer Licensing	Annual subscription for credential issuers	USD 5K to USD 25K per issuer
AI Tutor Premium	Anthropic Claude integration	USD 9.99 / month

5. What is shipped today

Production state as of 2026-05-21:

- 7 Cloudflare Workers live — versions 8d6d938f to aeaffe27
- 9 runtime libraries — access, wallet, community, jobs, affiliate, analytics, notify, admin-cms, VC ownership
- 26 transactional email templates — auth, payment lifecycle, wallet events, KYC, social, generic
- Public webhooks for Stripe and PayPal (code complete; awaiting live secrets)
- Bilingual (Vietnamese + English) on every page; zero hreflang regressions
- Brand kit V2 (224 assets), V3 staged
- Search via Pagefind 1.5.2 on hub, docs, read, edu

6. Compliance and governance

- Founder-approved voice rules forbid "guaranteed income," "get-rich-quick," fake countdown, and dark patterns
- Finance pages display "Not financial advice" disclaimer
- Edu pages display "Does not replace formal education" disclaimer
- Invest pages display "All investments carry risk of capital loss" disclaimer
- Audit BCC on every outbound transactional email
- Idempotency keys prevent duplicate charges and duplicate notifications
- HTML-escape on every variable substitution

7. The leadership team

The platform is led by founder Tran Ha Tam, who personally shipped the majority of the production codebase in 2026. The vetuonglai engineering culture prioritizes execution velocity, code review discipline, and brand voice fidelity. Senior advisory positions are being filled in 2026-2027 across finance, legal, regulatory, and regional expansion.
